

## Chillers

### CZ62 Chiller

Air-cooled chiller with 615 kW cooling capacity. This low-energy chiller is ready for use. The machine is mounted in a robust frame with a shock-resistant grid for condenser protection and can be moved easily with a crane.

## Technical specifications CZ62

|                               |        |                          |         |                                    |            |
|-------------------------------|--------|--------------------------|---------|------------------------------------|------------|
| Cooling capacity <sup>1</sup> | 615 kW | Internal pump            | Ja      | Height                             | 2480 mm    |
| Power consumption             | 186 kW | Maximum working pressure | 8 bar   | Weight <sup>2</sup>                | 7030 kg    |
| Current (nominal)             | 330 A  | Nominal pressure drop    | 38 kPa  | Sound level (at 10 m) <sup>2</sup> | 61.2 dB(A) |
| Voltage                       | 400 V  | Length                   | 5430 mm |                                    |            |
| Phases                        | 3 + A  | Width                    | 2440 mm |                                    |            |

<sup>1</sup> Air outside 35 °C, exit 27 °C
